HEELSOFT®

HEEL CARE CREAM

📌 Description

HEELSOFT® Heel Care Cream is a topical foot-care product designed to help moisturise dry, rough and cracked heels while maintaining a soft, smooth skin surface. Marketed by DOTCOM PHARMA, this cream is intended for targeted care of the heel area, which can become dry or rough due to friction, pressure, environmental conditions and moisture loss.

Its cream-based formulation allows convenient application to the heels and surrounding dry skin. Regular use according to the product label may help improve the feel and appearance of dry skin by supporting moisture retention and helping maintain skin softness.

HEELSOFT® is presented as a daily foot-care product for people seeking to maintain smoother-looking heels and care for areas prone to dryness and roughness. The supplied product artwork highlights benefits such as softening dry, rough heels, moisturising the skin and supporting a smoother-looking appearance.

The product is available in 12 g and 25 g pack sizes, offering options for different consumer preferences. Specific ingredients and claims relating to cracked heels should be confirmed against the approved product formulation and label before publication.

📄 Product Form

Cream.

HEELSOFT® is presented as a topical cream for external application to the heel area. Its cream format allows the product to be spread over dry skin as directed on the label.

🧍 Human Application

HEELSOFT® Heel Care Cream is intended for personal foot-care use.

- Dry heels: Helps moisturise dry skin on the heels.
- Rough skin: Helps soften rough areas and improve skin feel.
- Cracked-heel care: Intended to support moisturising care for dry, rough and cracked-looking heels.
- Smoother-looking skin: Helps maintain a softer, smoother appearance with appropriate use.
- Routine foot care: Can be incorporated into a regular foot-care routine according to the product label.

🌟 Advantages

1. Targeted foot care: Designed specifically for the heel area.
2. Moisturising support: Helps reduce the feeling of dryness.
3. Skin softening: Intended to help soften rough skin.
4. Convenient application: Cream format allows direct application to the required area.

Precautions

- For external use only.
- Avoid contact with the eyes.
- Do not apply to deep, bleeding or infected cracks unless advised by a healthcare professional.
- Discontinue use if irritation or an unwanted reaction occurs.
- Seek medical advice if cracks are severe, painful, bleeding or persistent.
- Keep out of reach of children.
- Follow the directions and warnings printed on the final product label.

Usage Instructions

1. Clean the feet and gently dry the heel area.
2. Take an appropriate amount of HEELSOFT® Heel Care Cream.
3. Apply gently over the dry or rough heel area.
4. Spread evenly according to the product label.
5. Use at the frequency stated on the approved packaging.

Storage Instructions

- Store in a cool, dry place.
- Keep away from direct sunlight and excessive heat.
- Keep the container or tube properly closed after use.
- Avoid contamination of the cream during application.
- Follow the storage conditions printed on the product label.

🙋 FAQs

1. What is HEELSOFT® Heel Care Cream used for?

HEELSOFT® is a foot-care cream intended to help moisturise dry, rough heels and maintain softer, smoother-looking skin.

2. Can HEELSOFT® be used for cracked heels?

The product artwork presents it for dry, rough and cracked heels. Severe, deep, bleeding or infected cracks require professional assessment rather than relying on a cosmetic cream alone.

3. What pack sizes are available for HEELSOFT®?

The supplied product images show two pack sizes: 12 g and 25 g.

4. How should HEELSOFT® Heel Care Cream be applied?

Clean and dry the heel area, then apply an appropriate amount according to the directions on the approved product label. Avoid applying it to open wounds unless advised by a healthcare professional.

5. Can HEELSOFT® be used every day?

It may be used as part of a regular foot-care routine if the final product label permits daily application. Follow the recommended frequency and discontinue use if irritation occurs.
