Dangri

📄 Description

Dangri is a type of protective workwear, typically worn in industrial, agricultural, or veterinary settings. It is designed to provide protection from dirt, debris, and certain physical hazards while offering comfort and ease of movement. Commonly worn in settings where workers are handling animals or working with machinery, Dangri ensures safety and hygiene while maintaining durability.

📏 Specifications

- **Material:** Durable cotton or polyester fabric
- **Sizes:** Available in multiple sizes (S, M, L, XL)
- **Design:** Full-body coverall with front zipper, adjustable cuffs, and waist straps
- **Colour:** Usually available in blue, green, or tan
- **Reinforcement:** Double-stitched at stress points for increased durability

⚙️ Usage

- Primarily used in veterinary clinics, farms, and industrial environments
- Protects against dirt, debris, and minor physical hazards
- Ideal for working around animals, machinery, or hazardous chemicals
- Often used by veterinary professionals, agricultural workers, and lab technicians

✅ Advantages

- Provides full-body protection, keeping workers clean and safe
- Made from breathable, comfortable fabric suitable for long hours of use
- Easy to clean and maintain
- Affordable and cost-effective for bulk purchases

⚠️ Disadvantages

- Not suited for high-risk environments with exposure to extreme temperatures or toxic substances
- Limited protection against heavy physical impacts or abrasions
- May not be ideal for use in environments requiring extreme durability (e.g., construction sites)

🛑 Precautions

- Ensure the Dangri is the correct size for comfort and mobility
- Avoid wearing in high-risk environments where stronger protection is needed (e.g., chemical spills, heavy machinery)
- Check for any tears or damage before use

🤲 Handling Instructions

- Wash according to care label instructions (usually machine washable)
- Avoid bleach or harsh chemicals that could degrade the fabric
- Inspect for wear and tear regularly, especially in high-stress areas like seams and zippers

🧼 Sterilization Details

- Machine washable at recommended temperatures
- Dry clean if necessary
- Sterilize if used in veterinary clinics or environments requiring hygienic standards

📊 HSN & HS Code

- **HSN Code:** 6210.40
- **HS Code:** 6210.40.00
  Workwear and protective clothing for agricultural, veterinary, or industrial use

👩‍⚕️ Human Application:

Protective clothing for agricultural workers, laboratory technicians, and medical personnel

Common in industries requiring hygiene and safety

🐾 Veterinary Application:

Used by veterinarians and animal care workers for protection during surgeries, handling, and other animal-related procedures
