

TORTODOT-C

Premium Turtle Calcium & Multivitamin Liquid – Shell & Metabolic Support

Description

This **premium veterinary supplement** is formulated for turtles requiring advanced nutritional support for **shell strength, bone development, and metabolic function**. It combines high-purity **calcium**, essential **vitamins**, and **magnesium** in a bioavailable liquid form, suitable for both aquatic and semi-aquatic turtles.

Ideal for **UVB-deprived enclosures**, poor dietary calcium, or during **growth and recovery phases**, this formula ensures your pet receives the highest quality nutritional reinforcement.

Specification

- **Product Name:** Premium Turtle Calcium + Vitamin Supplement (Oral Liquid)
- **Dosage Form:** Liquid
- **Target Species:** Turtles (aquatic & semi-aquatic species)
- **Pack Size:** 30 ml premium amber dropper bottle
- **Formulation Grade:** Premium veterinary grade

Composition (per 1 ml)

- **Calcium** – 1.2 g
- **Magnesium** – 6 mg
- **Vitamin D3 (Cholecalciferol)** – 5.1 IU
- **Ascorbic Acid (Vitamin C)** – 50 mg
- **Vitamin B12 (Cyanocobalamin)** – 5.4 mcg
- **Base:** Distilled water q.s. with stabilizers and preservatives

Category

- **Veterinary Feed Supplement**
- **Sub-category:** Premium Reptile Nutritional Support
- **Target:** Turtles

Indications

- Premium support for **shell formation, bone growth, and calcium metabolism**
- Corrects **hypocalcaemia**, soft shell syndrome, and early-stage metabolic bone disorder
- Used for immune support and improved **overall vitality** in captive turtles

Dosage

- **Juvenile Turtles:** 1–2 drops daily
- **Adult Turtles:** 3–5 drops daily
- Administer directly, or mix with moist food
- Use for **10–14 days** or as prescribed by a reptile veterinarian

Route of Administration

- **Oral** – Dropper to food or drinking bowl (not in water enclosure)

Advantages

- **Premium-grade** bioavailable calcium and vitamins
- Designed for **maximum absorption** without UVB reliance
- Supports **growth, recovery, immunity, and shell integrity**
- Made for sensitive exotic species – **gentle and effective**

? Frequently Asked Questions (FAQs)

Q1: Why is this called a "premium" supplement for turtles?

A: This supplement uses **high-purity ingredients** including **pharmaceutical-grade calcium** and **stabilized vitamins** for **maximum bioavailability**, making it more effective and safer for regular use in sensitive exotic species like turtles.

Q2: Can this help prevent MBD (Metabolic Bone Disease) in turtles?

A: Yes. **Metabolic Bone Disease (MBD)** is commonly caused by calcium and Vitamin D3 deficiency. This supplement provides **precise doses of calcium, magnesium, and Vitamin D3**, helping prevent and manage early signs of MBD, especially in turtles lacking UVB exposure.

Q3: Is Vitamin D3 (Cholecalciferol) necessary if the turtle is kept indoors?

A: Absolutely. **Vitamin D3 (Cholecalciferol)** is crucial for **calcium absorption** in reptiles. Indoor turtles without UVB light cannot synthesize D3 naturally, making oral supplementation essential for bone health.

Q4: Can I use this with other turtle supplements or medications?

A: It is generally safe, but always consult a veterinarian before combining with other **mineral or vitamin-rich supplements**. Avoid overlapping high-calcium or D3 products unless guided, to prevent **hypervitaminosis or mineral imbalance**.

Q5: How long should I continue giving this supplement?

A: It can be used in **10–14 day cycles** during growth, stress, or recovery periods. For long-term use, repeat cycles every few weeks or follow a **veterinarian's recommendation** based on your turtle's diet and condition.
