

VITDOT-H

Vital- H Type Veterinary Vitamin Feed Supplement Liquid

Description

Vital - H Type is a concentrated liquid vitamin feed supplement formulated for cattle, poultry, and aquaculture species. It provides essential fat-soluble vitamins along with trace elements such as selenium to support growth, immunity, reproduction, and overall metabolic health. This formulation aids in preventing vitamin deficiencies and promotes optimal performance in livestock and aquatic animals.

Composition

- Vitamin H (Biotin): 12.5 mg
- Elemental Selenium: 6 mcg
- Vitamin E (Tocopherol): 50 mg
- Vitamin A: 20,000 I.U.
- Vitamin D3: 10,000 I.U.

Excipients

Formulated with pharmaceutical-grade excipients and carriers to ensure homogeneity, stability, and bioavailability.

Category

Veterinary Vitamin Feed Supplement – Liquid formulation for Cattle, Poultry & Aquaculture.

Specification

- Physical Form: Liquid solution.
- Appearance: Clear to slightly yellow liquid.
- Assay: Each ingredient complies with $\pm 5\%$ of label claim.
- Microbial Limits: Meets veterinary feed supplement standards.
- Pack Sizes: 100 ml, 250 ml, and 1 litre bottles.

Indication

Indicated for supplementation of fat-soluble vitamins and trace minerals in cattle, poultry, and aquaculture to prevent deficiencies and support health and productivity.

Dosage and Administration

- Dosage: Administer orally or mix in drinking water/feed as per veterinary recommendation.
- Typical dose: 5 ml to 20 ml per animal per day depending on species, size, and physiological status.
- Frequency: Daily or as advised by a veterinary professional.

Route of Administration

Oral administration via drinking water, feed, or direct dosing.

Product Form

Liquid concentrate for ease of administration.

Usage

- Used as a daily vitamin supplement during growth, reproduction, or stress conditions.
- Supports immune function, metabolic processes, and overall animal well-being.

Advantages

- Provides essential fat-soluble vitamins and selenium for antioxidant support.
- Easy-to-administer liquid form for precise dosing.
- Suitable for multi-species use.
- Enhances health, fertility, and productivity.

Adverse Effects

- Safe when used as directed.
- Overdose may cause hypervitaminosis; adhere to recommended doses.
- Monitor animals for unusual reactions and consult a veterinarian if needed.

Withdrawal Period

No withdrawal period required when used as directed.

Precautions

- Use under veterinary guidance.
- Shake well before use.
- Store away from direct sunlight and extreme temperatures.
- Keep out of reach of children.

Storage and Handling

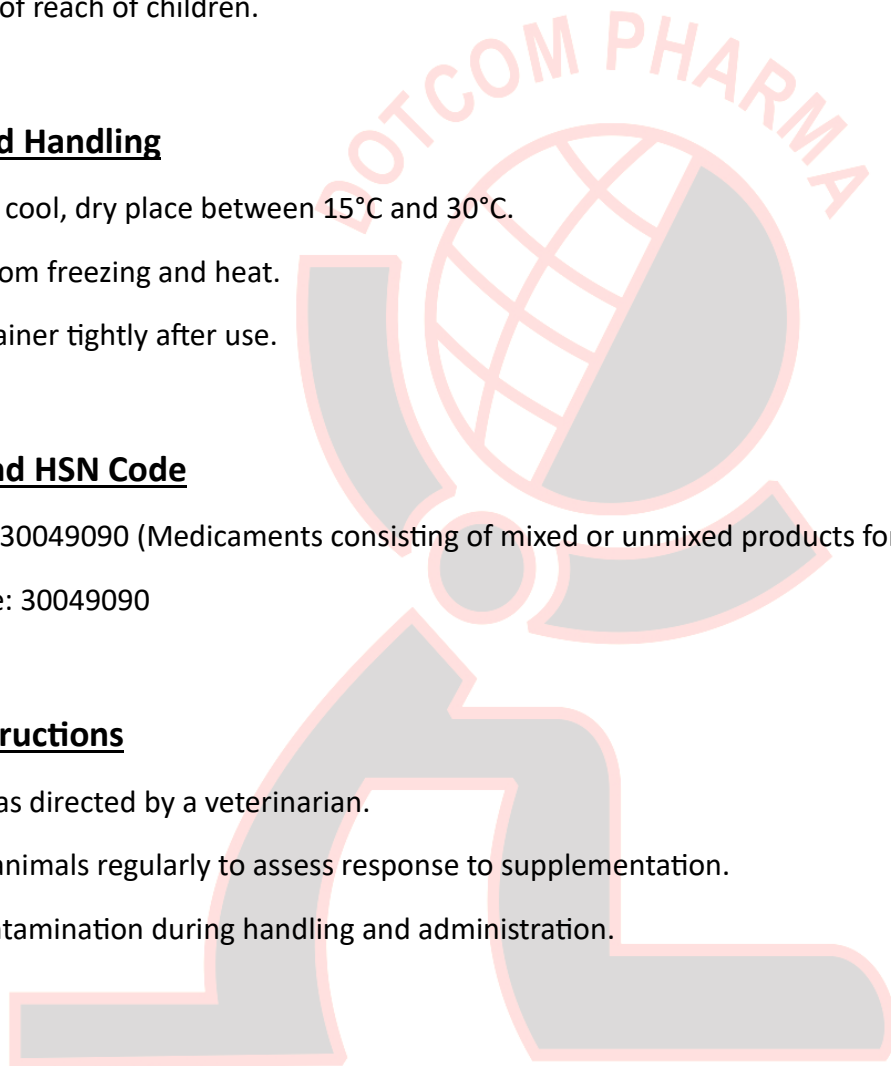

- Store in a cool, dry place between 15°C and 30°C.
- Protect from freezing and heat.
- Seal container tightly after use.

HS Code and HSN Code

- HS Code: 30049090 (Medicaments consisting of mixed or unmixed products for veterinary use)
- HSN Code: 30049090

Special Instructions

- Use only as directed by a veterinarian.
- Monitor animals regularly to assess response to supplementation.
- Avoid contamination during handling and administration.

? Frequently Asked Questions (FAQs)

Q: What is Vitamin H?

A: Vitamin H, also known as Biotin, is a water-soluble B-vitamin important for metabolism and skin, hair, and hoof health.

Q: Can this supplement be used for fish in aquaculture?

A: Yes, it is formulated for cattle, poultry, and aquaculture species, but dosing should be species-specific.

Q: How should I store this product?

A: Store in a cool, dry place away from sunlight and extremes of temperature.

Q: Is there a withdrawal period after using this supplement?

A: No withdrawal period is required when used as directed.

Q: How is this product administered?

A: Orally via drinking water, feed, or direct dosing.

Q: Are there any side effects?

A: Safe within recommended doses; overdose may cause toxicity.
