

PRODOTBOOST

Amino Acid + Multivitamin Liquid Veterinary Feed Supplement

Description

This is a highly bioavailable liquid veterinary feed supplement enriched with essential **amino acids** and **multivitamins**, formulated to support optimal growth, metabolism, immunity, and recovery in animals. It provides a potent combination of building blocks (amino acids) for protein synthesis along with key vitamins required for enzymatic reactions and physiological balance in livestock and companion animals.

Specification

Amino Acids per 200 ml:

- Arginine – 6 mg
- Histidine – 2 mg
- Isoleucine – 5 mg
- Leucine – 15 mg
- Lysine – 20 mg
- Methionine – 9 mg
- Phenylalanine – 5 mg
- Threonine – 5 mg
- Tryptophan – 5 mg
- Valine – 5 mg

Vitamins per 200 ml:

- Vitamin E – 6 mg
- Vitamin B1 (Thiamine) – 5 mg
- Vitamin B2 (Riboflavin) – 2 mg
- Vitamin B3 (Niacin) – 20 mg
- Vitamin B5 (Pantothenic Acid) – 4 mg
- Vitamin B6 (Pyridoxine) – 1 mg
- Vitamin B12 (Cobalamin) – 2 mcg
- Vitamin C (Ascorbic Acid) – 30 mg
- Folic Acid – 40 mcg
- Biotin (Vitamin H) – 50 mcg / Choline – 30 ml

Excipients:

q.s. to **200 ml** (Solvent system, stabilizers, flavouring agents, etc.)

Category

Veterinary feed supplement for **Cattle, Poultry, Aquaculture, Dogs & Cats** to promote health, growth, and vitality.

Pack Size

Supplied in a **200 ml bottle**, ideal for oral administration with precise dosage control.

Indications

- Promotes muscle development and protein synthesis
- Supports growth in young animals and improves weight gain
- Enhances immune function and stress resistance
- Aids recovery post-illness or vaccination
- Improves feed conversion efficiency
- Boosts metabolism, enzyme activity, and vitality

Composition Summary

Rich in essential amino acids and water-soluble & fat-soluble vitamins for complete metabolic and physiological support in animals.

Dosage and Administration

- Species: Cattle, Poultry, Aqua, Dogs & Cats
- Route: Oral (Mix in feed or drinking water)
- Suggested Dosage:
 - Cattle: 20–30 ml/day
 - Poultry: 1 ml/litre of drinking water
 - Aqua: As advised per ton of feed or litre of water
 - Dogs & Cats: 1–5 ml/day depending on size.

Product Form

Liquid supplement in a sealed **200 ml bottle** with dosing cap or dropper for convenient administration.

Usage

Used in feed or water to maintain and improve general health, nutritional status, and productivity across multiple species.

Advantages

- Complete spectrum of essential amino acids
- Wide range of water- and fat-soluble vitamins
- Boosts growth, repair, and recovery
- Improves overall vitality and stress response
- Easy-to-administer liquid form with high palatability

Adverse Effects

No significant adverse effects when used as directed. Overdosage may lead to vitamin toxicity—consult vet in such cases.

Withdrawal Period

No withdrawal period required. Safe for use in food-producing animals.

Storage

Store in a **cool, dry place**, away from direct sunlight. Keep bottle tightly closed after use.

Handling Precautions

- For veterinary use only
- Shake well before use
- Keep out of reach of children
- Do not use if seal is broken or expired

HS Code

HS Code: 2309.90 – Preparations of a kind used in animal nutrition

HSN Code

HSN Code: 2309 – Animal feed preparations not elsewhere classified

Special Instructions

- Ensure access to clean drinking water at all times
- Use continuously during stress, illness, or recovery
- Do not exceed recommended dosage unless advised by a veterinarian

Details of Human and Veterinary Application

- Formulated **exclusively for veterinary use**
- Not for human consumption
- Suitable for a wide range of animals (livestock & pets)

Frequently Asked Questions (FAQs)

Q: Can this supplement be used for young and adult animals?

A: Yes, it's beneficial for animals of all ages, especially during growth, recovery, or stress.

Q: How soon will I see results?

A: Visible improvements in energy, appetite, and coat health may appear within 7–10 days of consistent use.

Q: Is this product suitable for daily use?

A: Yes, it can be used daily or as recommended by a veterinarian.

Q: Can this be mixed with other supplements?

A: Generally safe, but always consult your veterinarian for compatibility.

Q: What if the animal refuses to take it?

A: Try mixing it into feed or water. Most animals accept the taste easily due to added flavouring agents.
