

AVESDOT-C

Premium Bird Calcium & Vitamin D3 Liquid Supplement Bone & Metabolic Support

Description

This is a **premium veterinary liquid supplement** formulated specifically for birds, combining **high-quality calcium**, phosphorus, magnesium, and essential vitamins (**Vitamin D3** and **Vitamin B12**) to promote **strong bones, feather quality, and metabolic health**. Ideal for birds with calcium-deficient diets or limited access to natural sunlight.

Specification

- **Product Name:** Premium Bird Calcium & Vitamin D3 Supplement (Oral Liquid)
- **Dosage Form:** Liquid
- **Target Species:** Birds (all avian species)
- **Pack Size:** 30 ml dropper bottle
- **Formulation Grade:** Premium veterinary grade

Composition (per 1 ml)

- **Calcium** – 1.80 g
- **Phosphorus** – 0.60 g
- **Magnesium** – 0.15 g
- **Vitamin D3 (Cholecalciferol)** – 24 IU
- **Vitamin B12 (Cyanocobalamin)** – 3 mcg
- **Base:** Distilled water with stabilizers q.s.

Category

- **Veterinary Feed Supplement**
- **Sub-category:** Avian Nutritional Support
- **Target:** Birds

Indications

- Prevents and treats **calcium deficiency** and **nutritional bone disorders**
- Supports **egg shell formation** and **bone mineralization**
- Enhances **metabolic processes** and **immune function**
- Recommended for **birds with poor diet or limited UVB exposure**

Dosage

- **Small Birds (e.g., Budgies, Canaries):** 2–3 drops daily
- **Medium to Large Birds (e.g., Parrots, Cockatiels):** 5–7 drops daily
- Administer orally via dropper or mix with drinking water/food
- Use continuously or as advised by a veterinarian

Route of Administration

- **Oral** – directly or mixed with food/water

Advantages

- Premium-grade minerals and vitamins for **optimal bioavailability**
- Supports **strong bones, eggshell quality, and overall health**
- Easy-to-use liquid form suitable for all bird sizes
- Helps prevent common avian nutritional disorders

Adverse Effects

- Rare at recommended doses
- Overdose may cause **hypercalcemia** or digestive upset
- Avoid use with other calcium supplements unless advised

Schedule

- **OTC (Over-the-Counter)** veterinary feed supplement

Precautions

- Store away from direct sunlight and heat
- Shake well before use
- Consult avian veterinarian if combined with other supplements or medications

Withdrawal Period

- Not applicable (companion birds)

Storage Conditions

- Store in a cool, dry place
- Keep bottle tightly closed after use

Handling

- Use dropper for precise dosing
- Avoid contamination of dropper tip

HS / HSN Code

HS Code: 2309

HSN Code: 2309.90.90

 **Category:** Animal feed supplements – Avian

Special Instructions

- Use as part of a balanced diet and appropriate husbandry practices
- Combine with UVB lighting for best Vitamin D3 synthesis and calcium metabolism
- Monitor bird health and adjust dosage as needed

Human vs Veterinary Application

- **Human Use:** Not for human consumption
- **Veterinary Use:** Specifically formulated for birds only

? Frequently Asked Questions (FAQs)

Q1: Why is Vitamin D3 important for birds?

A: Vitamin D3 (Cholecalciferol) helps birds absorb calcium efficiently, essential for healthy bones and eggshell production, especially when natural sunlight is limited.

Q2: Can I give this supplement to all types of birds?

A: Yes, it's formulated for all avian species, but dosage may vary by size and species.

Q3: What happens if I overdose calcium in birds?

A: Overdosing calcium can lead to hypercalcemia, causing kidney stress and digestive issues.

Q4: How should I store the supplement?

A: Store in a cool, dry place away from sunlight; tightly close the bottle after each use.

Q5: Can this be mixed in drinking water?

A: Yes, it can be mixed in water or food, but ensure the bird consumes the full dose.
