

Surgical Scissors – Straight (Indian & Imported)

Description

Surgical Scissors – Straight are essential instruments used across a wide range of medical and veterinary procedures. Known for their clean, precise cutting ability, these scissors are available in both **Indian-manufactured** and **Imported** variants. Designed with ergonomic handles and sharp blades, they are ideal for general surgical use, including tissue dissection, suture cutting, and dressing tasks.

Specifications

- Type: **Straight Blade Only**
- Blade Tips: Blunt/Blunt, Sharp/Sharp, Blunt/Sharp
- Sizes: 4", 5", 6", 7", 8"
- Variants: **Indian** and **Imported** (standard or premium steel)
- Finish: Satin or mirror-polished options

Material

- **Indian:** High-quality surgical stainless steel
- **Imported:** Premium-grade imported stainless steel
- Rust-resistant and corrosion-free in both variants

Category

- Surgical Cutting Instruments

Product Form

- Single reusable instrument
- Autoclavable and sterilizable

Usage

- Used for cutting tissues, sutures, gauze, and surgical dressings
- Suitable for general surgery, wound care, and minor surgical tasks

✓ Advantages

- Available in both affordable and premium options
- Sharp, durable cutting edges
- Ergonomic grip ensures control during procedures
- Long-lasting and reusable with proper care

✗ Disadvantages

- Blade sharpness may reduce over time with misuse
- Requires careful sterilization to maintain hygiene and performance

⚠ Precautions

- Do not use for non-surgical materials (e.g., wires)
- Inspect blade alignment and tip sharpness regularly
- Clean and dry immediately after sterilization

📖 Handling & Sterilization Details

- Fully autoclavable
- Use only medical-grade cleaning agents
- Store in sterile, moisture-free containers

🌸 Veterinary Application

- Commonly used for animal surgeries and wound dressing
- Suitable for dissection and soft tissue cutting in small and large animals

👩 Human Application

- Essential tool in operation theatres, emergency kits, and dressing trays
- Suitable for general surgery and outpatient procedures

HS & HSN Codes

- **HS Code:** 9018.90
- **HSN Code:** 9018

FAQs

Q: What's the difference between Indian and Imported scissors?

A: Indian scissors are economical and durable for routine use, while Imported ones offer enhanced precision, longevity, and finishing quality.

Q: Are these scissors autoclavable?

A: Yes, both variants are fully autoclavable and suitable for repeated sterilization.

Q: What sizes are commonly used?

A: Sizes range from 4" to 8" depending on surgical requirement.

Q: Are they suitable for both human and animal surgeries?

A: Absolutely. These scissors are widely used in both veterinary and human medical practices.
