

Baby Regular Spoon

Description

A **Baby Regular Spoon** is a simple, everyday feeding utensil designed for infants and toddlers transitioning into solid foods.

It features a **shallow bowl** and **smooth rounded edges** to ensure safe, comfortable feeding without risking gum irritation.

These spoons are used for feeding purees, cereals, mashed foods, and soft solids.

Specification

- **Product Name:** Baby Regular Spoon
- **Category:** Baby Feeding Utensils
- **Product Form:** Standard feeding spoon with rounded bowl and elongated handle
- **Length:** 12–18 cm
- **Bowl Width:** 2–3 cm
- **Surface Finish:** Polished or matte depending on material
- **Optional Features:**
 - Soft-grip handle
 - Anti-slip coating
 - Engraved or smooth handles
 - Colour variants

Types

- **Stainless Steel Baby Spoon:** Durable, long-lasting, hygienic
- **BPA-Free Plastic Spoon:** Lightweight and safe for everyday feeding
- **Wooden Baby Spoon:** Natural, eco-friendly, gentle on gums

Material

- **Stainless Steel:** Strong, rust-resistant, easy to clean
- **BPA-Free Plastic:** Lightweight, dishwasher-safe
- **Bamboo/Wood:** Non-toxic, anti-bacterial properties, biodegradable

Sizes & Shapes

- **Standard Size:** 12–18 cm length
- **Bowl Shape:** Rounded, shallow scooping bowl
- **Handle Shape:**
 - Straight handle
 - Slightly curved ergonomic handle
 - Non-slip coated handle

Usage

- Feeding cereals, yogurt, purees, mashed fruits and vegetables
- Suitable for infants starting solid foods
- Can also assist toddlers learning to self-feed

Handling

- Hold spoon midway on the handle for better control
- Offer small portions to prevent gagging
- Maintain a gentle feeding pace

Sterilisation & Cleaning

- **Stainless steel spoons:** Wash with warm water or boil for sterilisation
- **Plastic spoons:** Wash with mild detergent; some are dishwasher-safe
- **Wooden spoons:** Hand wash only; avoid soaking; dry immediately

Advantages

- Simple and versatile for daily feeding
- Safe rounded edges for baby's gums
- Available in multiple materials
- Lightweight and easy for parents to handle
- Durable and long-lasting

Disadvantages

- Metal spoons may feel cold for babies
- Plastic spoons may scratch over time
- Wooden variants require extra care
- Not suitable for newborn feeding

Precautions

- Inspect for cracks, sharp edges, or discoloration
- Ensure plastic spoons are BPA-free
- Do not let babies walk or crawl with a spoon in their mouth
- Replace immediately if damaged

HS & HSN Codes

- **HS Code:** 8215.99 – Spoons and tableware (other)
- **HSN Code (India):** 8215.99.90 – Other spoons/tableware items

Frequently Asked Questions

Q1. From what age can a Baby Regular Spoon (BRS) be used?

Usually from **6 months and above**, when babies start solids.

Q2. Is stainless steel safe for babies?

Yes, high-quality stainless steel is hygienic, rust-resistant, and widely used for kids.

Q3. Which spoon is best for early feeding?

Soft-tipped plastic or silicone spoons are ideal for beginners; regular spoons are better once the baby gets used to solids.

Q4. How often should Baby Regular Spoon (BRS) be replaced?

Replace immediately if you notice scratches, dents, or chipped coatings.

Q5. Can Baby Regular Spoons be sterilised?

Stainless steel can be boiled; plastic and wooden spoons should follow material-specific care.
