

Tooth Cutter

Description

The **Tooth Cutter 10"** is a precision veterinary tool designed for cutting or trimming the teeth of animals, especially in large animals like horses, cattle, and goats. It allows veterinarians and animal caretakers to manage dental health by removing overgrown or damaged teeth, promoting better feeding and overall health.

Specifications

Specification	Details
Length	10 inches (approx. 25.4 cm)
Material	High-grade stainless steel
Handle	Ergonomic, non-slip grip
Cutting Edge	Sharp, hardened blades for clean cutting
Weight	Lightweight for easy handling

Material

- Surgical-grade stainless steel for corrosion resistance and durability
- Plastic or rubber-coated handle for better grip

Category

- Veterinary Dental Instrument
- Tooth Cutting and Trimming Tools

Product Form

- Handheld plier-style cutting tool
- Single-piece construction with two sharp cutting blades

Usage

- Used for cutting or trimming overgrown or damaged animal teeth
- Commonly used in horses, cattle, goats, and other livestock
- Helps prevent feeding difficulties and dental infections
- Part of routine veterinary dental care

Advantages

- Precision cutting with sharp blades
- Durable, rust-resistant material
- Ergonomic design reduces hand fatigue
- Easy to clean and sterilize

Disadvantages

- Requires veterinary expertise to avoid injury
- Improper use may cause pain or damage to animals
- Blades require regular sharpening for effectiveness

Precautions

- Use only by trained personnel
- Sterilize before and after use
- Inspect blades regularly for sharpness and damage
- Handle carefully to prevent accidents

HS / HSN Code

- **HS Code:** 8202.99 (Hand tools)
- **HSN Code:** 8202.99.90

Handling Instructions

- Wear protective gloves during use
- Clean and sterilize after every procedure

Sterilization Details

- Autoclave compatible
- Can also be sterilized with chemical disinfectants

Veterinary Application

- Used in livestock dental care for maintaining proper tooth length and health
- Essential for animal feeding and overall health maintenance

Human Application

- Not intended for human dental use
- Exclusively veterinary tool

FAQs (Frequently Asked Questions)
