

Medicine Tray With Lid

Description

The Medicine Tray With Lid is a sturdy and hygienic tray designed to hold, organize, and transport medicines safely in hospitals, clinics, and veterinary settings. The fitted lid helps maintain cleanliness and protects contents from contamination.

Specifications

- **Material:** High-quality stainless steel (SS304 or SS316) for durability and corrosion resistance.
- **Dimensions:** Common sizes include 12" x 8" x 2" (30 x 20 x 5 cm), customizable on request.
- **Shape:** Rectangular with raised edges and a secure lid.
- **Lid:** Hinged or removable lid with latch to ensure contents stay protected.
- **Finish:** Mirror or satin finish for easy cleaning.

Types

- **Standard Medicine Tray With Lid:** Basic design for general medical use.
- **Compartmentalized Tray With Lid:** Divided sections to organize different medicines.
- **Stackable Tray With Lid:** Designed for space-efficient storage and sterilization.

Product Form

- **Individual Tray:** Single unit for daily medical rounds or storage.
- **Tray Set:** Multiple trays in varied sizes for diverse medical applications.

Material

- **Stainless Steel (SS304/316):** Preferred for strength and sterility.
- **Plastic (for disposable variants):** For single-use applications to minimize contamination.

Category

- **Medical Instruments & Accessories:** Classified under medical trays and storage products.
- **Veterinary Instruments & Accessories:** Used for safe medicine handling in animal care.

Usage

Human Application

- Used in hospitals, clinics, and pharmacies for organizing and transporting medicines.
- Helps maintain sterility and prevents contamination during medical rounds.

Veterinary Application

- Used in veterinary clinics and animal hospitals for medicine storage and handling.
- Ensures safe administration and organization of veterinary drugs.

Advantages

- **Protection:** Lid prevents dust, moisture, and contamination.
- **Organization:** Keeps medicines neatly arranged and easily accessible.
- **Durability:** Stainless steel ensures longevity and easy maintenance.

Disadvantages

- **Weight:** Stainless steel trays can be heavier compared to plastic ones.
- **Cost:** Higher upfront investment compared to disposable trays.

Precautions

- **Cleaning:** Clean and sterilize regularly to maintain hygiene.
- **Handling:** Avoid rough handling to prevent dents or damage.
- **Storage:** Store in clean, dry places to avoid corrosion.

HS / HSN Code

- **HS Code:** 9018.90
- **HSN Code:** 9018.90.99
- **Description:** Instruments and appliances used in medical, surgical, dental, or veterinary sciences.

Sterilization Details

- **Methods:**
 - Autoclaving for stainless steel trays.
 - Chemical sterilization for plastic or sensitive materials.
- **Frequency:** After every use.

Frequently Asked Questions (FAQs)

1. **Is the medicine tray with lid suitable for both human and veterinary use?**
Yes, it is designed for versatile use in both fields.
2. **What materials are used for the trays?**
Stainless steel and plastic (for disposable variants).
3. **Are there compartment options available?**
Yes, compartmentalized trays are available for better organization.
4. **Can the tray be sterilized?**
Yes, it can be autoclaved or chemically sterilized depending on material.
5. **Are custom sizes available?**
Yes, customization is offered to meet specific requirements.
