

# Dressing Drum

## Description

The **Dressing Drum** is a veterinary tool used for safely and efficiently applying dressings to animal wounds or surgical sites. This tool is designed to hold a bandage or dressing material and ensure it stays in place during application. It's commonly used in both small and large animal veterinary practices for post-surgery care or injury treatment, offering quick and accurate dressing application.

## Specifications

- **Material:** Stainless steel or high-quality plastic drum
- **Size:** Varies from small (for pets) to large (for livestock)
- **Capacity:** Holds up to 10-20 meters of bandage material
- **Design:** Drum-shaped, with a built-in tension mechanism to hold dressing tightly
- **Handle:** Easy-grip, ergonomic handle for precise control
- **Colour:** Silver or black

## Usage

- Used to apply bandages or dressings to wounds on animals
- Helps hold the dressing material securely in place while applying it to the wound
- Commonly used in veterinary clinics and animal hospitals
- Ideal for large animals like cattle or horses, but also suitable for small animals like dogs and cats

## Advantages

- **Time-efficient:** Makes dressing application faster and more precise
- **Prevents contamination:** Ensures that the dressing material stays clean and sterile
- **Ease of use:** Ergonomically designed for quick, controlled application
- **Versatile:** Can be used for a wide range of animal sizes and injuries
- **Durable:** Made from high-quality materials for long-term use

### **Disadvantages**

- Requires cleaning after each use to avoid contamination
- Can be difficult to use on very small animals or delicate injuries
- Some models can be bulky for smaller veterinary clinics

### **Precautions**

- Ensure the dressing material is sterile before use
- Handle carefully to avoid contaminating the dressing or injury site
- Do not use the dressing drum on open wounds without professional consultation
- Regularly clean and sterilize the drum to maintain hygiene

### **Handling Instructions**

- After use, disassemble and clean thoroughly
- Store in a dry, clean location to prevent contamination
- Always check for damage or wear before each use
- Use only with appropriate-sized bandaging material

### **Sterilization Details**

- Rinse the drum with warm water to remove excess dressing material
- Sterilize the drum and all parts with a veterinary-approved disinfectant
- Do not immerse the drum in water if it has electrical components (if applicable)

### **HSN & HS Code**

- **HSN Code:** 9018.49
- **HS Code:** 9018.49.90  
*Veterinary instruments for bandaging and dressing application*

### **Human Application:**

- ✗ Not used for human applications

## **Veterinary Application:**

Ideal for applying dressings on large and small animals

Commonly used post-surgery, for wound care, and in emergency veterinary care

## **? Frequently Asked Questions (FAQs)**

### **1. How do I use the Dressing Drum?**

Place the dressing material in the drum, adjust the tension, and use the handle to apply the material securely to the wound.

### **2. Can I use it for small animals?**

Yes, but it may be more effective for larger animals. Some models are designed specifically for small animal use.

### **3. Is the Dressing Drum easy to clean?**

Yes, it is made from materials that are easy to disinfect and clean after use.

### **4. Can the Dressing Drum be reused?**

Yes, the drum is reusable as long as it is cleaned and sterilized after each use.

### **5. Can I use any type of bandage with the Dressing Drum?**

It works with most standard bandage rolls, but always check that the size is appropriate for your model.
