

Scissor Sharp Point

Description

Scissor Sharp Point are precision surgical scissors featuring sharp, pointed blades designed for cutting delicate tissues with accuracy. Ideal for both human and veterinary surgical procedures where fine dissection is required.

Specifications

- **Blade Type:** Sharp pointed tips for precise cutting
- **Material:** High-grade surgical stainless steel
- **Length:** Typically available in sizes ranging from 5" to 8" (confirm specific sizes if needed)

Material

- Surgical stainless steel ensuring durability, corrosion resistance, and ease of sterilization

Category

- Surgical Scissors

Product Form

- Manual, reusable sharp-point scissors

Usage

- Precise cutting and dissection of tissues during surgeries
- Suitable for detailed surgical work requiring accuracy
- Used in both veterinary and human medical fields

Advantages

- Sharp pointed blades for accurate tissue cutting
- Durable and resistant to corrosion
- Easy to sterilize and maintain

Disadvantages

- Requires careful handling to avoid injury or damage
- Blades may dull over time and need sharpening

Precautions

- Sterilize thoroughly before and after use
- Handle with care to maintain blade sharpness and alignment

Handling & Sterilization Details

- Compatible with autoclave, chemical, and dry heat sterilization methods
- Store in sterile, dry conditions post-cleaning

Veterinary Application

- Used for precise tissue dissection and cutting in animal surgeries

Human Application

- Utilized in human surgeries for detailed and accurate tissue cutting

HS & HSN Codes

- **HS Code:** 9018.31
- **HSN Code:** 9018

FAQs

Q: What makes sharp point scissors different from regular scissors?

A: They have pointed, sharp blades designed for precise and delicate cutting.

Q: Are these scissors reusable?

A: Yes, they are made of surgical stainless steel suitable for repeated sterilization.

Q: What kind of surgeries use sharp point scissors?

A: They are used in surgeries requiring accurate tissue dissection, both human and veterinary.

Q: How should I care for sharp point scissors?

A: Sterilize after each use and handle carefully to maintain blade sharpness.
