

Straw Cutter- Heavy

Description

The Heavy Straw Cutter is a robust agricultural tool designed for efficiently cutting straw, hay, and fodder into smaller pieces. Its durable construction ensures longevity and consistent performance, making it ideal for farms and livestock feeding operations. The cutter helps in preparing feed by increasing digestibility and ease of handling.

Specifications & Sizes

- Heavy-duty design for long-lasting use
- Cutting blade made of high-quality steel
- Dimensions vary based on model (customizable)
- Suitable for manual or motorized operation

Types

- Manual heavy straw cutters
- Motorized heavy straw cutters

Material

- High-grade steel blades for sharp, efficient cutting
- Sturdy metal frame for durability

Category

- Agricultural Equipment
- Livestock Feed Preparation Tools

Product Form

- Standalone cutter units
- May include motorized or manual options

Usage

- Cutting straw and fodder into manageable sizes for animal feed
- Used in farms, dairies, and livestock centres
- Helps improve feed intake and reduces wastage

Advantages

- Durable and built for heavy use
- Enhances efficiency in feed preparation
- Reduces labour and time in cutting straw manually

Disadvantages

- Motorized models require power source and maintenance
- Manual models require physical effort

Precautions

- Handle blades with care to avoid injury
- Ensure proper maintenance for motorized cutters
- Use appropriate safety gear while operating

Handling & Maintenance

- Regularly sharpen blades for best performance
- Clean after use to prevent rust and debris buildup
- Store in dry place to maintain durability

Veterinary Application

- Prepares feed for livestock such as cattle, sheep, and goats
- Essential tool in animal husbandry and feed management

Human Application

- Primarily agricultural but indirectly supports human nutrition through livestock feed preparation

HS & HSN Codes

- **HS Code:** 8433.50 — Harvesting machinery (including straw cutters)
- **HSN Code:** 8433 — Harvesting or threshing machinery

FAQs

Q: Is the straw cutter suitable for all types of straw?

A: Yes, it is designed to cut various types of straw and fodder efficiently.

Q: Can the cutter be used manually?

A: Yes, there are manual heavy straw cutter models available.

Q: What maintenance does the cutter require?

A: Regular blade sharpening and cleaning to ensure optimal performance.

Q: Is it safe to operate the motorized version alone?

A: Always follow safety guidelines and use protective gear during operation.
