(or as advised by a veterinarian)

Product Form

- Liquid oral supplement

Advantages

- Fast absorption and bioavailability
- Boosts energy, productivity, and vitality
- Strengthens immunity during infections and illness
- Reduces stress during vaccination, transportation, heat, or feed changes

Adverse Effects

- None when used as per recommended dosage
- Overdosage may cause mild gastrointestinal upset

Schedule

- Not a controlled drug; no prescription required for feed supplement use

Withdrawal Period

- **No withdrawal period** — safe for use in food-producing animals

Storage

- Store in a cool, dry place away from sunlight
- Keep bottle tightly closed after each use

Handling

- Shake well before use
- Use clean equipment for dosing to avoid contamination

HS & HSN Codes

- **HS Code:** 2309
- **HSN Code:** 23099090

Special Instructions

- **For veterinary use only**
- Not for medicinal or injectable use
- Keep out of reach of children
- Consult veterinarian before prolonged usage

Frequently Asked Questions (FAQs)

Q: What is B-Complex Liquid used for?

A: It's used to supplement essential B vitamins in cattle and poultry to boost immunity, digestion, and productivity.

Q: Is it safe for both cattle and poultry?

A: Yes! It is formulated for both species and safe when dosed properly.

Q: Can it be mixed with feed or water?

A: Yes, it is water-soluble and can be administered via feed or drinking water.

Q: Is a withdrawal period required?

A: No, it's a nutritional supplement with no withdrawal period.

Q: When should it be given?

A: During stress, illness, recovery, vaccination, transport, or low appetite periods.
