

Needle Holder with Scissor

Description

A Needle Holder with Scissor is a dual-function surgical instrument combining a needle holder and scissors. It allows surgeons to grasp needles securely and cut sutures quickly without switching tools. The 5.5" size offers precision and control, ideal for delicate procedures.

Specifications

- **Material:** High-quality stainless steel (SS304 or SS316) for durability and corrosion resistance.
- **Size:** 5.5 inches in length.
- **Design:** Ring handles with locking ratchet mechanism; integrated scissors on one arm.
- **Jaw Type:** Serrated jaws for firm needle grip.
- **Finish:** Mirror or satin finish for easy cleaning.

Types

- Needle Holder with Scissor, 5.5" size — suitable for fine surgical tasks.

Product Form

- Single instrument.

Material

- Stainless Steel (SS304/316).

Category

- Medical Surgical Instruments.

Human Application

- Used in surgeries requiring quick switching between suturing and cutting.

Veterinary Application

- Suitable for veterinary surgeries needing precision and efficiency.

✓ Advantages

- Combines two tools, reducing instrument changes.
- Strong grip and sharp scissors in one device.
- Durable and easy to sterilize.

✗ Disadvantages

- Slightly heavier due to combined functions.
- Requires skilful handling

⚠ Precautions

- Sterilize after every use.
- Avoid rough handling to maintain instrument integrity.

🏷 HS / HSN Code

- **HS Code:** 9018.39
- **HSN Code:** 9018.39.00
- **Description:** Needle holders and similar surgical instruments.

🧼 Sterilization Details

- Autoclaving recommended.
- Sterilize after each use.

? Frequently Asked Questions (FAQs)
